**Conformity assessment – General  
requirements for third-party marks  
of conformity**

PREVIEW

ICS 03.120.20

**Mauritius Standards Bureau  
Moka**

## National foreword

This Mauritian Standard is identical with the International Standard **ISO/IEC 17030:2003**, *Conformity assessment - General requirements for third-party marks of conformity*. It was adopted by the Mauritius Standards Bureau on the recommendation of the **Conformity Assessment Standards Committee** and approval of the **Standards Council** on 21 February 2017. It was notified in the Government Gazette on **29 April 2017\***

For the purpose of this standard the following change should be made:

- (i) the words 'International Standard' should be replaced by 'Mauritian Standard';
- (ii) clause 2, Normative reference should be corrected as follows:
  - ISO/IEC 17000, *Conformity assessment — Vocabulary and general principles*

The following Mauritian Standard is identical to the International Standard, which is referenced in the adopted standard:

International Standard	Corresponding Mauritian Standard
ISO/IEC 17000	MS ISO/IEC 17000, <i>Conformity assessment — Vocabulary and general principles</i>

## Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work. In the field of conformity assessment, the ISO Committee on conformity assessment (CASCO) is responsible for the development of International Standards and Guides.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

Draft International Standards are circulated to the national bodies for voting. Publication as an International Standard requires approval by at least 75 % of the national bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO/IEC 17030 was prepared by the ISO Committee on conformity assessment (CASCO).

It was circulated for voting to the national bodies of both ISO and IEC, and was approved by both organizations.

## Introduction

Marks of conformity take many forms and different uses. They can convey useful information about a product, or indicate particular characteristics of a product such as its safety, quality, performance, reliability or impact on the environment. They are found on products, certificates and publications denoting the conformity to specified requirements of a product, management system, service, process, person or an organization. Most important for all marks of conformity is to gain the confidence of the market, including consumers, in products and other objects of conformity assessment to which these marks have been applied.

The prime purpose of this International Standard is to enable a uniform approach to the use of third-party marks of conformity, to fill relevant gaps in existing ISO, IEC, ISO/IEC Standards and Guides, to address potential problems arising from different uses of third-party marks of conformity, to provide a clear and rational basis for their use, and to set out general requirements. This International Standard concentrates on third-party marks of conformity but may also be used as guidance for other applications of marks of conformity.

This International Standard is based on market feedback and demands from various users and issuers of marks of conformity assessment. It takes account of the ISO report on *Marks of conformity assessment*, published in May 1999. The use of this International Standard should lead to improved market confidence, international recognition and consumer acceptance of third-party marks of conformity.

PREVIEW

# Conformity assessment — General requirements for third-party marks of conformity

## 1 Scope

This International Standard provides general requirements for third-party marks of conformity, including their issue and use.

NOTE This International Standard can also be used as guidance in using marks of conformity in other than third-party conformity assessment activity.

## 2 Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited apply. For undated references, the latest edition of the referenced document (including any amendments) applies.

ISO/IEC 17000, *Conformity assessment — General vocabulary*<sup>1)</sup>

## 3 Terms and definitions

For the purposes of this document, the terms and definitions given in ISO/IEC 17000 and the following apply.

### 3.1

#### **third-party mark of conformity**

protected mark issued by a body performing third-party conformity assessment, indicating that an object of conformity assessment (product, process, person, system or body) is in conformity with specified requirements

EXAMPLES Third-party marks of conformity can be: product certification marks, quality/environment management system certification marks, environmental conformity marks, etc.

NOTE 1 A protected mark is a mark legally protected against unauthorized use.

NOTE 2 The specified requirements are generally stated in “normative” documents such as International Standards, regional or national standards, regulations and specifications.

### 3.2

#### **owner of a third-party mark of conformity**

person or organization that has legal rights to a third-party mark of conformity
