PREVIEW

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 264, *Fireworks*.

A list of all the parts in the ISO 26261 series can be found on the ISO website.

Fireworks — Category 4 —

Part 1: Terminology

1 Scope

This document provides terminology relating to the design, construction, primary packaging and testing of category 4 fireworks.

2 Normative references

There are no normative references in this document.

3 Terms and definitions

For the purposes of this document, the following terms and definitions apply.

ISO and IEC maintain terminological databases for use in standardization at the following addresses:

- IEC Electropedia: available at <http://www.electropedia.org/>
- ISO Online browsing platform: available at <http://www.iso.org/obp>

3.1 General terms

3.1.1 category 4

fireworks which present a high hazard, whose handling and use require specialist knowledge and whose noise level is not harmful to human health

3.1.2 type

sample representative of the production envisaged used in *type tests* (3.2.47)

3.1.3 generic type

set of articles with a common, very general, design feature and/or with a common characteristic effect

3.1.4 subtype

set of articles within a *generic type* (3.1.3) with specific design features

3.1.5 individual item

article within a *generic type* (3.1.3) and/or a *subtype* (3.1.4), for which every possible feature and characteristic has been fixed

Note 1 to entry: Each feature and characteristic will be specified in the *technical name* (3.1.6) or a technical data sheet, as appropriate.

3.1.6 technical name

general description of an *individual item* (3.1.5)
